THE MAKs -ONE PAGE

The Mak's family owned shop looks like every other garden shop you could find for miles around, but what makes this store unique is that **not everything is what it seems**.

Mary has always loved herbiology, and treats her plants like family. That might sound weird, but at The Mak's shop, they **don't carry average plants**. At her store, the really interesting plants are the one's hidden down in the basement locked and looking for a way out.

Mary works the shop by day with her two reluctant and un-cooperative sons, and usually the days are uneventful...but, not every day is average, because with the Mak's, **nothing is average**. One ring on that ratty old store phone changes a normal day, to an extra-ordinary one. You see the only time that particular phone rings, is when a new customer needs her families special skills.

Mary has tried to teach her children everything she knows about plants and the **environment**, and up to a point, Miky and Morus showed less then an interest in learning about the ecosystem, until there family store branched off into a new direction, **plant protection**. Most residents don't even realize what is becoming of thier plant planet. If you took a look inside the Mak's family store basement, you would discover that the Mak's family business is all about dealing with, and selling **monster plants** to people who like Mary, love the environment and especially wild pet plants.

The Mak's deal with many **environmental issues** day to day, including ozone depletion, toxic waste, oil spills, clear cutting, acid rain, genetic alteration, endangered plants, and study of herbology while working in the shop. But,as soon as they get a call, they are out in the town in their atrium car and ready to fight whatever the ecosystem can throw at them. With their vinegar filled Super soakers in hand, the boys keep **plant crimes to a minimum**. But it's not just the plants that they always have to worry about. Some people don't find the Mak's way of plant control necessary. And with that, the Mak's have their work cut out for them in this newly infested city and trying to clean the streets **one plant problem at a time**.
